To whom it may concern,

This letter identifies Digimation, Inc., a Florida corporation ("Digimation"), as the sole developer and manufacturer of the DART™ firearms training simulator and DART Trace™ software.

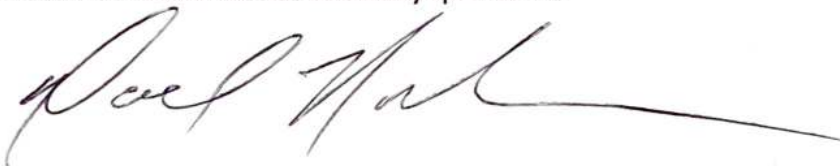

Digimation is also the sole manufacturer of hardware service, warranty, maintenance, and Digimation Certified train the trainer programs.

DART is the smallest firearms training simulator available and measures just 5.75 x 4.75 x 3.5 inches in size. This makes it possible to set up DART virtually anywhere, without the need for a dedicated training room.

DART features the most realistic and feature-rich digital firing range available anywhere. In addition, DART comes with DART Creator software which can be used to create an unlimited variety of courses of fire. DART also comes bundles with the Visible Weapon software, the most realistic interactive simulation of a pistol ever developed.

DART Trace tracks a shooter's aim in real-time and can be used to diagnose potential problems with marksmanship fundamentals such as aim point, breath and trigger control.

Please feel free to contact us with any questions.
